(+966) (0) 55-616-8331
modafarhan.com
github.com/farhanma

- Interests** High-Performance Computing (HPC), Computational Fluid Dynamics (CFD), Unstructured grids, Irregular computations, Sparse linear algebra, Fast Multipole Method (FMM), Structured grids, Thread/data level parallelism, Performance modeling, engineering, and optimizations, Emerging architectures, Parallel and distributed systems, and Message Passing Interface (MPI)
- Education**
- King Abdullah University of Science and Technology**, Saudi Arabia 2014 - 2019
Ph.D., Computer Science. **Advisor: Prof. David E. Keyes**
THESIS – Unstructured Computations on Emerging Architectures
- King Abdullah University of Science and Technology**, Saudi Arabia 2012 - 2013
M.Sc., Computer Science.
COURSEWORK – Algorithm analysis and design, Parallel programming paradigms (MPI), Programming languages (Ruby, Haskell, GO, and Python), Combinatorial machine learning, High-performance computing I and II (algorithms, architectures, and applications), Computing systems and concurrency (Advanced Operating Systems), Data analytics (artificial intelligence, data mining, and machine learning), GPU and GPGPU Programming (OpenGL and CUDA), and Scientific Visualization (OpenGL)
- King Faisal University**, Saudi Arabia 2007 - 2012
B.Sc., Computer Science.
SENIOR PROJECT – An RFID-based Smart Authentication Distributed System
- Research**
1. *Optimizing Unstructured Computations on Emerging, Energy-austere HPC Architectures*
Mohammed A. Al Farhan and David E. Keyes
To be submitted, SPAA 2019
 2. *A Climbing Robotic System for Date Palm Tree Farming Operations*
Jeff S. Shamma, Mohammad Z. Shaqura, and **Mohammed A. Al Farhan**
Patent filed in September, 2018 (U.S. Application No. 62/730,122)
 3. *Extreme Scale FMM-accelerated Boundary Integral Equation Solver for Wave Scattering*
Mustafa Abduljabbar, **Mohammed A. Al Farhan**, Noha Al-Harthi, Rui Chen, Rio Yokota, Hakan Bagci, and David E. Keyes
SIAM Journal on Scientific Computing (SISC), 2018 [under review]
SOFTWARE RELEASE – <https://ecrc.github.io/BEMFMM/>
 4. *Optimizations of Unstructured Aerodynamics Computations for Many-core Architectures*¹
Mohammed A. Al Farhan and David E. Keyes
IEEE Transactions on Parallel and Distributed Systems (TPDS), 2018
 5. *Performance Evaluation of Computation and Communication Kernels of the Fast Multipole Method on Intel Manycore Architecture*
Mustafa Abduljabbar, **Mohammed A. Al Farhan**, Rio Yokota, and David E. Keyes
International European Conference on Parallel and Distributed Computing (Euro-Par), 2018
 6. *Unstructured Computational Aerodynamics on Many Integrated Core Architecture*
Mohammed A. Al Farhan, Dinesh K. Kaushik, and David E. Keyes
Parallel Computing Journal (PARCO), 2016
 7. *An Algorithm for Reduct Cardinality Minimization*
Hassan AbouEisha, **Mohammed A. Al Farhan**, Igor Chikalov, and Mikhail Moshkov
IEEE International Conference on Granular Computing (GrC), 2013

¹ Highlighted in IEEE TPDS home page for the October 2018 journal issue.

Experience	RoboCrop Systems² , Saudi Arabia. Co-founder Robotics software engineer, Full stack developer, and business development co-leader	Sep 2017 - Present
	Saudi Electricity Company , Saudi Arabia. Software Engineer Developed a distributed system based on intelligent algorithms that monitors and detects anomalies such as malfunctions, tampers, and manipulations in the reading meters of customers	May 2012 - Aug 2012
	Saudi Aramco , Saudi Arabia. Software Engineer Intern Developed a distributed and scalable key-value store system that keeps track of all IT incidents, problems, and infrastructure change requests. Then, it updates the concerned parties on the current status of the said problems, automatically effectively reducing managerial bottlenecks	Summer 2011
	Saudi Aramco , Saudi Arabia. Software Engineer Intern Developed a database system that collects reports on IT problems and logs them into a unified disk-based repository where they can always be recalled for further processing with ease	Summer 2010
Teaching	AMCS 312: High-Performance Computing. Teaching Assistant (TA) for Prof. David E. Keyes <ul style="list-style-type: none"> • King Abdullah University of Science and Technology <ul style="list-style-type: none"> – Fall 2014, Fall 2015, Fall 2016, Fall 2017, and Fall 2018 • Saudi Arabian Oil Company (SAUDI ARAMCO) <ul style="list-style-type: none"> – Fall 2018 • Blue Waters Online Courses (https://bw-course.ncsa.illinois.edu/) <ul style="list-style-type: none"> – Fall 2016 [Introduction to High Performance Computing] • KAUST Visualization and Supercomputing Summer School <ul style="list-style-type: none"> – Summer 2016 	
Talks	Slides available at https://speakerdeck.com/farhanma <ol style="list-style-type: none"> 1. <i>Optimizing Unstructured Computations on Emerging, Energy-austere HPC Architectures</i> <ol style="list-style-type: none"> (a) SIAM Conference on Computational Science and Engineering, 2019. Spokane, Washington, USA 2. <i>Optimizations of Unstructured Aerodynamics Computations for Intel Knights Landing Architecture</i> <ol style="list-style-type: none"> (a) Intel eXtreme Computing User Group (IXPUG) Meeting, 2018. KAUST, KSA (b) SIAM Conference on Parallel Processing for Scientific Computing, 2018. Tokyo, Japan (c) Intel HPC Developer Conference, 2017. Denver, Colorado, USA (d) Fully Predictive Complex Computational Fluid Dynamics Workshop, 2017. KAUST, KSA (e) High Performance Computing Saudi Arabia (HPC Saudi) Conference, 2017. KAUST, KSA³ (f) SIAM Conference on Computational Science and Engineering, 2017. Atlanta, Georgia, USA (g) Scalable Hierarchical Algorithms for eXtreme Computing Workshop, 2017. KAUST, KSA 3. <i>Implicit Unstructured Computational Aerodynamics on Many-Integrated Core Architecture</i> <ol style="list-style-type: none"> (a) International Conference on Parallel Computational Fluid Dynamics, 2014. Trondheim, Norway (b) Scalable Hierarchical Algorithms for eXtreme Computing workshop, 2014. KAUST, KSA 	
Skills	PROGRAMMING LANGUAGES – C/C++, Python, Java, and Shell Script PROGRAMMING MODELS – x86 Compiler Intrinsics, OpenMP, pThreads, TBB, CUDA, and MPI SOFTWARE DEVELOPMENT TOOLS – Make, CMake, and GNU Autoconf PERFORMANCE ANALYSIS TOOLS – Perf, Valgrind, Likwid, PAPI, Advisor, VTune, and Gperftools	

² Top 13 finalists in TAQADAM Startup Accelerator (<https://innovation.kaust.edu.sa/taqadam/>) (2nd Cohort) – Awarded \$20,000

³ Received Best Poster Award
