Interests	High-Performance Computing (HPC), Computational Fluid Dynamics (CFD), Partial Differential Equations (PDE), Unstructured grids, Irregular computations, Sparse linear algebra, Fast Multipole Method (FMM), Structured grids, Thread/data-level parallelism, Performance modeling and optimization, and Parallel and distributed systems	
Education	King Abdullah University of Science and Technology , Saudi Arabia	2014 – 2019
	Ph.D., Computer Science. Advisor: Prof. David E. Keyes DISSERTATION – Unstructured Computations on Emerging Architectures	
	King Abdullah University of Science and Technology , Saudi Arabia	2012 – 2013
Research	M.Sc., Computer Science. COURSEWORK – Algorithm analysis and design, Parallel programming paradigms (MPI), Programming languages (Ruby, Haskell, GO, and Python), Combinatorial machine learning, High-performance computing I and II (algorithms, architectures, and applications), Computing systems and concurrency (Advanced Operating Systems), Data analytics (artificial intelligence, data mining, and machine learning), GPU and GPGPU Programming (OpenGL and CUDA), and Scientific visualization (OpenGL)	
	King Faisal University , Saudi Arabia	2007 – 2012
	B.Sc., Computer Science. SENIOR PROJECT – An RFID-based Distributed System for Smart Authentication	
Experience	1. <i>Unstructured Computations on Emerging Architectures</i> Mohammed A. Al Farhan and David E. Keyes IEEE Transactions on Parallel and Distributed Systems (TPDS), 2019 [To be submitted] SOFTWARE RELEASE – https://ecrc.github.io/FUN3D/	
	2. <i>Extreme Scale FMM-accelerated Boundary Integral Equation Solver for Wave Scattering</i> Mustafa Abduljabbar, Mohammed A. Al Farhan , Noha Al-Harthi, Rui Chen, Rio Yokota, Hakan Bagci, and David E. Keyes SIAM Journal on Scientific Computing (SISC), 2018 [under review] SOFTWARE RELEASE – https://ecrc.github.io/BEMFMM/	
	3. <i>Optimizations of Unstructured Aerodynamics Computations for Many-core Architectures</i> Mohammed A. Al Farhan and David E. Keyes IEEE Transactions on Parallel and Distributed Systems (TPDS), 2018 <i>Highlighted in the IEEE TPDS homepage for October 2018 issue</i>	
	4. <i>Performance Evaluation of Computation and Communication Kernels of the Fast Multipole Method on Intel Manycore Architecture</i> Mustafa Abduljabbar, Mohammed A. Al Farhan , Rio Yokota, and David E. Keyes International European Conference on Parallel and Distributed Computing (Euro-Par), 2017	
	5. <i>Unstructured Computational Aerodynamics on Many Integrated Core Architecture</i> Mohammed A. Al Farhan , Dinesh K. Kaushik, and David E. Keyes Parallel Computing Journal (PARCO), 2016	
	6. <i>An Algorithm for Reduct Cardinality Minimization</i> Hassan AbouEisha, Mohammed A. Al Farhan , Igor Chikalov, and Mikhail Moshkov IEEE International Conference on Granular Computing (GrC), 2013	

and infrastructure change requests. Then, it updates the concerned parties on the current status of the said problems, automatically effectively reducing managerial bottlenecks

Saudi Aramco, Saudi Arabia. Software Engineer Intern Summer 2010
Developed a database system that collects reports on IT problems and logs them into a unified disk-based repository where they can always be recalled for further processing with ease

Services Served as a peer reviewer for the ACM Transactions on Parallel Computing (TOPC), PLOS One, International Journal of High Performance Computing Applications (IJHPCA), and IEEE Cluster 2016

Teaching **AMCS 312: High-Performance Computing.** Teaching Assistant (TA) for Prof. David E. Keyes

- King Abdullah University of Science and Technology, Saudi Arabia
 - Fall 2014, Fall 2015, Fall 2016, Fall 2017, and Fall 2018
- Saudi Aramco, Saudi Arabia
 - Fall 2018
- Blue Waters Online Courses
 - Fall 2016 [Introduction to High Performance Computing]
- KAUST Visualization and Supercomputing Summer School, Saudi Arabia
 - Summer 2016

Talks Slides available at <https://speakerdeck.com/farhanma>

1. *Unstructured Computations on Emerging Architectures*
 - (a) SIAM Conference on Computational Science and Engineering, 2019. Spokane, Washington, USA
2. *BEMFMM: An Extreme Scale FMM-Accelerated BIE Solver for Wave Scattering*
 - (a) SIAM Conference on Computational Science and Engineering, 2019. Spokane, Washington, USA
 - (b) Intel eXtreme Computing User Group (IXPUG) Meeting, 2018. KAUST, KSA
 - (c) SIAM Conference on Parallel Processing for Scientific Computing, 2018. Tokyo, Japan
3. *Optimizations of Unstructured Aerodynamics Computations for Intel Knights Landing Architecture*
 - (a) Intel eXtreme Computing User Group (IXPUG) Meeting, 2018. KAUST, KSA
 - (b) SIAM Conference on Parallel Processing for Scientific Computing, 2018. Tokyo, Japan
 - (c) Intel HPC Developer Conference, 2017. Denver, Colorado, USA
 - (d) Fully Predictive Complex Computational Fluid Dynamics Workshop, 2017. KAUST, KSA
 - (e) High Performance Computing Saudi Arabia (HPC Saudi) Conference, 2017. KAUST, KSA
Received best poster award
 - (f) SIAM Conference on Computational Science and Engineering, 2017. Atlanta, Georgia, USA
 - (g) Scalable Hierarchical Algorithms for eXtreme Computing Workshop, 2017. KAUST, KSA
4. *Performance Evaluation of Fast Multipole Method on Intel Manycore Architecture*
 - (a) International European Conference on Parallel and Distributed Computing (Euro-Par), 2017
 - (b) HPC in Asia Poster Competition, International Supercomputing Conference (ISC), 2017
5. *Implicit Unstructured Computational Aerodynamics on Many-Integrated Core Architecture*
 - (a) International Conference on Parallel Computational Fluid Dynamics, 2014. Trondheim, Norway
 - (b) Scalable Hierarchical Algorithms for eXtreme Computing workshop, 2014. KAUST, KSA

Programming LANGUAGES – C/C++, Python, Java, and Shell Script
MODELS – x86 Compiler Intrinsics, OpenMP, pThreads, TBB, CUDA, and MPI
TOOLS – Make, CMake, Autotools, perf tools, and Valgrind
